SUMMARY

Final-year Software Engineering student with a minor in Cyber Forensics and Cyber Law, building a strong foundation in cybersecurity, cloud computing, and secure software development. Hands-on experience in Python programming, full-stack development, data analysis, and technical support, with exposure to risk management, security controls, and data privacy principles. Proven ability to develop scalable, user-focused solutions while collaborating across technical and non-technical teams. Motivated to advance into cybersecurity roles and pursue graduate studies in Cybersecurity, Information Security, or Digital Forensics.

EXPERIENCE

APNAPAN — Data/Software Engineering Intern | Delhi | May 2025 - Aug 2025

- Engineered a data insights platform using Python, Streamlit, Pandas and Plotly to analyze 100+ student surveys.
- Integrated Google Sheets API and authentication to enable secure real-time data access.
- Improved reporting efficiency and stakeholder adoption by approximately 40%.

Swanirbhar — PR Strategist Intern | Kolkata | May 2025 – Aug 2025

- Conducted data collection from 50+ surveys and interviews.
- Analyzed insights from 50+ survey and interview responses to support incubation and research strategy reports.
- Prepared 5+ structured stakeholder presentations used for funding and program decisions

Hypley Pty Ltd — Remote Virtual Assistant |USA| Apr 2024 – May 2025

- Managed and verified 200+ business listings to improve marketplace accuracy.
- Conducted web research and assisted with email marketing campaigns.
- Increased outreach engagement by approximately 15%.

LEADERSHIP

DTU International Student Society —Technical Activity Coordinator | Delhi | Nov 2022 - Jan 2024

- Led planning and execution of 5+ technical events with 150+ international student participants.
- Coordinated with faculty and student teams to deliver hands-on learning in emerging technologies.
- Strengthened cross-cultural collaboration among 150+ international students, improving event participation and peer networking.

EDUCATION

Delhi Technological University — B.Tech in Software Engineering (Minor: Cyber Forensics) | Expected Jul 2026

ACADEMIC COURSEWORK

- Data Structures and Algorithms | Object Oriented Programming | Machine Learning | Software Quality and Metrics
- Information & Network Security | Malware Analysis | Cyber Law | Ethical Hacking | Cyber Forensic
- Database Management System | Empirical Software Engineering | Computer Networks
- Web Technology | Software Reliability | Object Oriented Software Engineering

CERTIFICATES

Foundations of Cybersecurity — Google (Coursera), 2025

- Developed foundational knowledge of cybersecurity concepts, including security domains, common cyber threats and attacks, risk management, security frameworks, and basic security controls used to protect systems, networks, and data.

Introduction to Cloud Computing — IBM (Coursera), 2025

- Gained foundational understanding of cloud computing concepts, including cloud service models (IaaS, PaaS, SaaS), deployment models, virtualization, scalability, and the role of cloud platforms in modern application development.

Joy of Computing Using Python — NPTEL (IIT Madras), 2025

- Gained proficiency in Python programming, and real-world applications.

Introduction to Software Engineering — IBM (Coursera), 2024

- Mastered software engineering processes, methodologies, and best practices for developing technical solutions

Programming Fundamentals — Duke University (Coursera), 2024

- Mastered foundational programming concepts, including algorithms, data structures, and problem-solving.

Virtual Assistant Programme — ALX Africa, 2024

- Enhanced end-to-end virtual assistance expertise in client communication, time management, email & calendar management, internet research, presentations, data handling, and confidential remote operations using Google Workspace.

SKILLS

- **Programming Languages:** Python, JavaScript, C, C++
- **Web, Data & Databases:** React, Next.js, Streamlit, Pandas, Plotly, MongoDB, MySQL
- **Cybersecurity & Cloud Fundamentals:** Security Principles, Risk Management, Authentication & Access Control, Data Privacy Basics, Cloud Computing Concepts (IaaS, PaaS, SaaS)
- **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Google Workspace, Google Sheets API, GitHub Copilot
- **Analytical & Professional Skills:** Data Analysis, Data Visualization, Problem Solving, Technical Documentation, Cross-functional Collaboration

PROJECTS

Apnapan Data Insights Platform | Python, Streamlit, MongoDB, Pandas, Plotly

GitHub: <https://github.com/ButtySaylee/data-insights-generator-v2>

- Developed a secure full-stack analytics platform for 100+ users with interactive dashboards and automated PDF reporting, improving analysis efficiency by 40%.

Personal Portfolio Website | React, Next.js, Tailwind CSS

GitHub: <https://github.com/ButtySaylee/butty-portfolio>

- Built a high-performance, responsive developer portfolio with project showcases, GitHub integration, and downloadable resume, optimized for speed and accessibility.
