SUMMARY

Final Year Software Engineering student with a minor in Cyber Forensic and Cyber Law. Hands-on experience in Python-based full-stack development, data analysis, virtual assistance, and technical support. Proven in building scalable tools for 100+ users while ensuring data privacy compliance and collaborating on cross-functional teams to deliver impactful solutions. Eager to leverage analytical thinking and problem-solving in innovative environments across tech, research, and administrative roles.

EXPERIENCE

LEAD School — Quality Assurance Freelancer | India | Jan 2026 - Present

- Performing quality assurance reviews of educational books to ensure accuracy, grammar, and formatting consistency.
- Identifying and correcting errors in content, diagrams, and references to improve clarity and compliance with standards.
- Delivering error-free learning materials across multiple grade levels, enhancing reliability and student outcomes.

APNAPAN — Data/Software Engineering Intern | Delhi, India | May 2025 - Aug 2025

- Engineered a data insights platform using Python, Streamlit, Pandas and Plotly to analyze 100+ student surveys.
- Integrated Google Sheets API and authentication to enable secure real-time data access.
- Improved reporting efficiency and stakeholder adoption by approximately 40%.

Swanirbhar — PR Strategist Intern | Kolkata, India | May 2025 – Aug 2025

- Conducted data collection from 50+ surveys and interviews.
- Analyzed insights from 50+ survey and interview responses to support incubation and research strategy reports.

Hypley Pty Ltd — Remote Virtual Assistant |USA| Apr 2024 – May 2025

- Managed and verified 200+ business listings to improve marketplace accuracy.
- Conducted web research and assisted with email marketing campaigns.
- Increased outreach engagement by approximately 15%.

Technical Support Assistant — Libtelco Class Project | Monrovia, Liberia | Oct 2019 – Jul 2021

- Diagnosed and resolved software/hardware issues for internal users, minimizing downtime by 25% through proactive maintenance.

LEADERSHIP

DTU International Student Society —Technical Activity Coordinator | Delhi | Nov 2022 - Jan 2024

- Led planning and execution of 5+ technical events with 150+ international student participants..
- Strengthened cross-cultural collaboration among 150+ international students, improving event participation and peer networking.

EDUCATION

Delhi Technological University — B.Tech in Software Engineering (Minor: Cyber Forensics) | Expected Jul 2026

CERTIFICATES

Foundations of Cybersecurity — Google (Coursera), 2025

- Developed foundational knowledge of cybersecurity concepts, including security domains, common cyber threats and attacks, risk management, security frameworks, and basic security controls used to protect systems, networks, and data.

Joy of Computing Using Python — NPTEL (IIT Madras), 2025

- Gained proficiency in Python programming, and real-world applications.

Introduction to Software Engineering — IBM (Coursera), 2024

- Mastered software engineering processes, methodologies, and best practices for developing technical solutions

Programming Fundamentals — Duke University (Coursera), 2024

- Mastered foundational programming concepts, including algorithms, data structures, and problem-solving.

Virtual Assistant Programme — ALX Africa, 2024

- Enhanced end-to-end virtual assistance expertise in client communication, time management, email & calendar management, internet research, presentations, data handling, and confidential remote operations using Google Workspace.

SKILLS

- **Programming Languages:** Python, JavaScript, C, C++
- **Web, Data & Databases:** React, Next.js, Streamlit, Pandas, Plotly, MongoDB, MySQL
- **Cybersecurity & Cloud Fundamentals:** Security Principles, Risk Management, Authentication & Access Control, Data Privacy Basics, Cloud Computing Concepts (IaaS, PaaS, SaaS)
- **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Google Workspace, Google Sheets API, GitHub Copilot
- **Analytical & Professional Skills:** Data Analysis, Data Visualization, Problem Solving, Technical Documentation, Cross-functional Collaboration

PROJECT

Apnapan Data Insights Platform | Python, Streamlit, MongoDB, Pandas, Plotly

GitHub: <https://github.com/ButtySaylee/data-insights-generator-v2>

- Developed a secure full-stack analytics platform for 100+ users with interactive dashboards and automated PDF reporting, improving analysis efficiency by 40%.
